

Gas Vision 2050

Delivering a clean energy future

WEBINAR 14th OCTOBER 2020
at 1 pm (AEDT)

Join this webinar to hear industry leaders discuss the new landmark report, Gas Vision 2050: Delivering a clean energy future, and the transformational technologies and projects that will decarbonise the gas sector and help Australia meet its emissions reduction commitments.

In Australia's journey to a cleaner energy future, gas and gas infrastructure has a significant role to play, and the industry is responding through research and projects that are leading the decarbonisation of Australia's gas sector.
